- Flexible Mobile Hardware Options
- Fast, Robust, and Feature-rich
- Clean, Bright User-interface
- Easy to Implement and Use
- Optional Voice Activated
- Resident Messaging
- Easily Customizable for any Facility

KEY BENEFITS

- Accurate, Consistent Charting
- Monitors and Promotes Compliance in Real-time
- Aids in Quick Completion in Real-time
- Increases Reimbursement
- Increases Care Provider Communication
- Favorable Staff Utilization and System Compliance

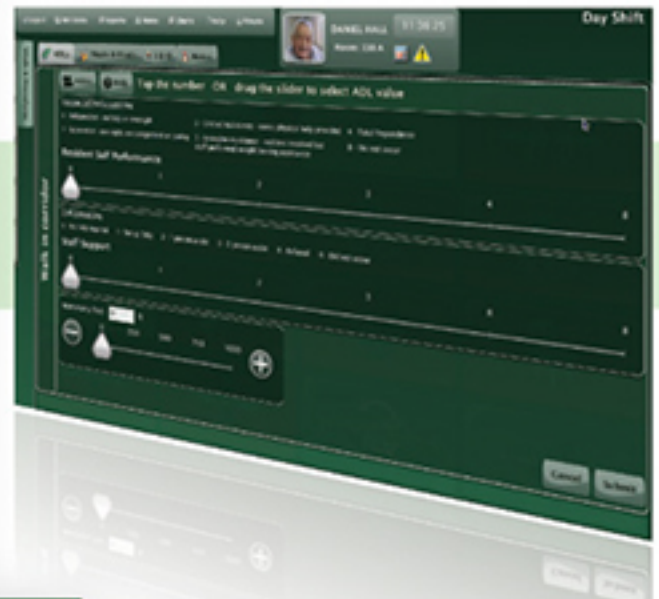

CareRight Technologies is dedicated to bringing Long-term Care providers and caregivers innovative clinical software solutions using the latest technology and tools.

Our CareRight™ suite offers your organization complementary applications containing features and functionality that surpass currently available systems.

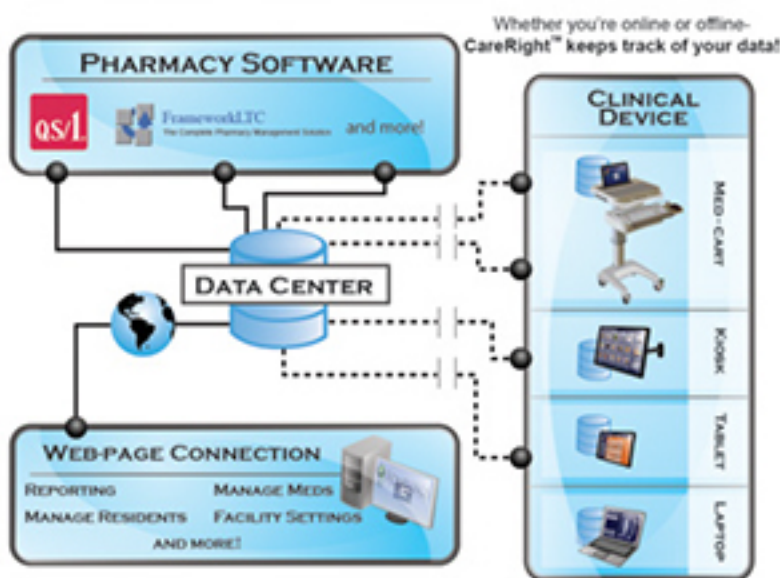

CareRight™ Point-of-Care utilizes the latest technology to conveniently allow caregivers to track and chart all ADLs at the bedside, using a variety of mobile devices (including voice activated), making it a “true” point-of-care system. CareRight™ Point-of-Care is customizable, full-featured, easy to implement, and easy to use.

HERE'S MORE . . .

- No More Combing Through Paper Charts for Information
- Spot Trends Before Becoming Critical
- Easily Identify Significant Changes
- Avoids Inaccuracies and Exposing Facility to Undue Risk
- Survey Process goes Smoother
- Stamps Every Observation with a Date and Time
- Intake and Output Monitoring
- Easy-to-read Reports
- Track Meals, Fluids, and Snacks
- Visualize Resident Data with Graphs and Charts

PATENTED DELIVERY SYSTEM

While CareRight™ is a web-based system, its patented technology allows caregivers to access patient records and continue entering data even during Internet outages.

CareRight's Point-of-Care replaces paper forms and end-of-shift flow sheets for the most accurate, real-time documentation; maximizing Medicare reimbursement and allowing more time for resident care.
