CareRight Technologies is dedicated to bringing Long-term Care providers and caregivers innovative clinical software solutions using the latest technology and tools.

Our CareRight™ suite offers your organization complementary applications containing features and functionality that surpass currently available systems.

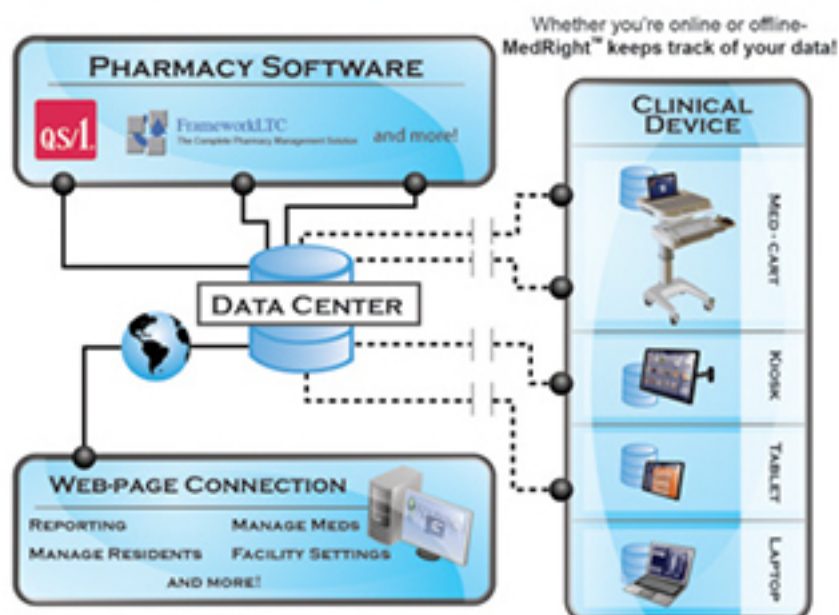

MedRight™ is more than just an electronic medication administration record (eMAR); it is a comprehensive physician orders/treatments package specifically designed for Long-term care environments, around real patient-centered workflows and integration with pharmacy processes. It's modern, web-based user interface is easy to implement and easy to use.

HERE'S MORE . . .

- First Data Bank Drug Library
- Customizable set-up and facility parameters
- Quickly record vitals and immediately review charts
- Comprehensive and flexible reporting
- Patient Scheduling
- Physician and ancillary orders entered quickly
- Late med and follow-up reminders
- Taper and insulin medications easily handled
- Integrated messaging system
- Track inventory and request refills

PATENTED DELIVERY SYSTEM

While MedRight™ is a web-based system, its patented technology allows caregivers to access patient records, enter data, and continue to pass meds even during Internet outages.
